Alberta legislature Passes Wheat Board Last Saturday

SEVERAL NEW AMENDMENTS
TO COMPLY WITH SASKATCHEWAN BILL PASSED—BILLS
TAKE EFFECT ON ASSENT OF

Under a hot fire from the batteries of opposition, the Alberta legislature passed the Wheat Board Bill last Saturday afternoon, and gave the measure final passage without a division. Several new amendments, already adopted by the Saskatchewan legislature, were put through and the meeting chair makes the bill take effect upon the assent of the lieutenant-governor-in-council.

During the discussion, a number of important facts were emphasized concerning the operation of the wheat board, both under the federal and provincial laws. One of these is that the board, while using elevators for storage, will have no control over the commercial operation of elevators. This point was brought up in a question by W. C. Johnston, leader, Medicine Hat, during the discussion of the bill. Defining the powers of the board, the following clause (1) of that section, which gives the board the right to determine what constitutes delivery to or possession by the board:

Answering the query of Opposition leader Boyle, Attorney-General J. E. Brownlee explained that the clause had been inserted with reference to the board may sell any quantity of wheat which it may possess, or any quantity of domestic produce for purchase overseas and for export to foreign countries, at such prices as may be obtainable.

Attorney-General Brownlee said that at the conference at Regina between the Alberta and Saskatchewan legislatures, and their respective premier, and their respective attorneys, James Stewart, former chairman of the 1919 wheat board, had raised the question whether this clause should be included in such a manner as to prevent future contracts being entered into. According to the question, if the clause were included, it would be necessary to make full contracts for delivery to the board. The question was whether the wording of this clause would limit the board to sell wheat only in its possession. The clause in the provincial bill remedied what the federal bill remedied what the federal bill remedied. Mr. Brownlee explained that the following amendment as clause (1) of Sec. 4 giving the board the right to permit persons owning or operating mills in Alberta to grind the wheat of farmers and others to such amount as they may desire, and to sell the same for any one individual and upon such terms and conditions as may be deemed advisable to issue licenses to millers.

France Gives Germany Four Days To Pay Difference Of Opinion Of Political Leaders

Premier Poincaré in a note to Herr Von Hoese, the German chargé d'affaires, summarily ended the efforts of Germany to postpone payment of the debts of Germany to French creditors, contracted by Germany before the war. After a brief consultation with Charles De Lasteyrie, minister of finance, and Louis Dubois, president of the reparations commission, M. Poincaré handed to the German chargé d'affaires a reply, couched in the terms of a demand, rather than in the words of a diplomatic communication, crisply brushing aside all Germany's excuses and explanations.

Maharg is Leader Sask. Opposition

Hon. J. A. Maharg, opposition member for Moose, and president of the Saskatchewan Grain Growers' Association, is house leader for the opposition in the Saskatchewan legislature. Mr. Maharg was selected as house leader as a caucus of opposition members immediately after the prorogation of the eighth Wheat Board session. On the decision of the meeting board conveyed to Mr. Maharg, he realized his willingness to accept, subject to the condition of the meeting board, the position of house leader of the opposition group should be in no way conflict with the policies and principles of the Saskatchewan Grain Growers' Association, as "recognized" had constituted from the time.

Premier-elect Bracken, of Manitoba, will probably be elected by a large majority in the coming election. It is thought he may be elected by a landslide.

IMPORTANT MEETING OF G. W. V. A.

An important meeting of all active and associate members of the G. W. V. A. will be called for next Monday evening in the G. W. V. A. hall.

All active members are requested to meet sharp at eight o'clock for the transaction of the regular association business.

At 8:45 there will be a general meeting of all active and associate members for the transaction of club business. All members of both branches are urged to be present.

With the general principle enunciated by the opposition, not a word was heard in support of the bill. Mr. Brownlee said that the government is not anxious to do anything by order in council but it was desired to leave a nothing in the bill to be decided by the legislature.

With this in view, it was brought before the house in the form of a resolution, which was carried by a vote of 10 to 5.

It was decided to leave a nothing in the bill to be decided by the legislature. The government is not anxious to do anything by order in council but it was desired to leave a nothing in the bill to be decided by the legislature.

GOVERNMENT LINES TO TAKE GAS QUESTION AS ACHIEVEMENT

MOTION OF CALGARY MEMBERS
TO ALLOW GAS COMPANY TO
CROSS ROADS WAS DEFEATED
—PREMIER SAYS QUESTION
NOT YET ONE FOR CONSIDERATION
OF THE GOVERNMENT.

Taking the ground that the matter is not yet one for the consideration of the Government, the motion of the Calgary members to allow the Gas Company to cross the roads was defeated by a vote of 10 to 5.

The Calgary members left their resolution asking that the Gas Company be permitted to cross road allowances in the house Monday night on a division in which the majority was 10 to 5.

The vote was taken after the refusal of F. J. White, mover of the resolution, to withdraw his motion.

The premier suggested that withdrawal of the motion would be a concession to the Gas Company.

The Calgary members were taken up with the motion during which Mr. White, Robert Peterson and G. Marshall made strong appeals for support of the motion.

The motion was defeated by a vote of 10 to 5. The Calgary members were taken up with the motion during which Mr. White, Robert Peterson and G. Marshall made strong appeals for support of the motion.

Premier Herbert Greenfield made the statement on the government position immediately following the opening of the afternoon session and an interval during which several questions pertaining to other questions were asked by members. The premier said:

"On July 14 the government appointed A. C. Carpenter, of the public utility board, a commission to inquire into the supply and distribution of natural gas in the province, along the lines indicated in the order-in-council, but having special reference to the application of the Canadian Natural Gas, Light, Heat and Power Company."

"A formal report of his findings is not yet available, on account of circumstances beyond his control. In the meantime, if any member of the legislature has obtained an interim verbal report from Mr. Carpenter from which it appears:

"That the government has accepted the recommendation of the public utility board that the Gas Company be permitted to cross road allowances in the province, I will be glad to make a statement on the subject."

"The government, although urged by the city of Calgary to make a definite statement as to its attitude on this question, has not yet made a statement. It is not yet a question of the Gas Company's right to cross road allowances."

"There is, consequently, no application of the Gas Company's right to cross road allowances in the province. The government, although urged by the city of Calgary to make a definite statement as to its attitude on this question, has not yet made a statement. It is not yet a question of the Gas Company's right to cross road allowances."

THE REDCLIFF REVIEW, THURSDAY, AUGUST 3, 1922.

PAY YOUR TAXES

Now that the gas question is practically settled, for the time being at least, it would be well if ratepayers would turn their attention more particularly to town affairs. In this connection one of the most important items is the payment of taxes.

There is still another period in which a discount is offered for the payment of taxes. This period extends to September 15th, when a discount of 7 per cent. is allowed on taxes paid before that date.

If this town is expected to carry on in the future, it is essential that taxes should be paid, as this is the only source from which the council can secure funds to meet its obligations.

Pay your taxes and help keep the town machinery moving.

THE GAS QUESTION

W. C. Smith, member for Redcliff in the legislature, and W. G. Johnston, Labor member for Medicine Hat, are deserving of great praise for the efforts they put forth in fighting the cause of this district in the gas controversy. These men spared neither time or trouble in working with representatives from the two centres in this long drawn-out fight, and there is no doubt that their efforts had much to do with the result of the vote when the question came before the legislature.

Although the Hon. Fernin Baker did not figure prominently in the debate there is no doubt his influence was used to good advantage in the cabinet.

This district is fortunate in having three representatives who enjoy the confidence of the present administration, and the two municipalities most concerned are grateful to them for the interest they have taken in this matter.

Of course we do not mean to say by this that these were the only men to whom we are indebted for the final outcome of this affair. The Mayors and councils of both municipalities left no stone unturned in the case of their respective municipalities. They have stayed faithfully with the task before them, and the final outcome is a fitting reward for their efforts.

THE WHEAT BOARD

As a result of the recent special session of the legislature there now appears to be little doubt but that a Wheat Board will be established in time to be of some service to the farmers in the handling of this year's crop. Many of the obstacles which loomed up on the horizon in the earlier stages of this movement appear to have been overcome on the discussion which followed the introduction of the bill in the legislature, and what looked like long holes in the wall as passed by the Dominion Parliament, have been remedied by the powers conferred upon the Board, and the introduction of it by the legislatures of Alberta and Saskatchewan.

However, as we said in a previous issue, much of the success of the Board will depend on the men chosen by the Dominion government to act on it. In this connection the provincial legislature is taking no chances, as the final settling in operation of the machinery provided at these special sessions of both legislatures is to be left until the personnel of the

Board is known.

With this safeguard and with the assurance of the Dominion government that the provinces concerned will be consulted in the appointments made, there is little doubt that the Wheat Board will be given a fair trial this year.

Once the machinery is set in motion it will be the duty of every farmer and every U. F. A. local to render every possible assistance in helping to make the venture a success.

GOOD BUSINESS

Who ate the provincial legislature first started out on its campaign to combat the grasshopper pest there were those who poo-hooed the idea and referred to it as a venture of less of a job. Even farmers themselves—and some of them in this district—assumed an attitude of indifference, and in the opening stages of the campaign paid little or no attention to the warnings and instructions of government officials appointed to conduct it. Later on, however, when the grasshoppers began to show up in millions, these same farmers were falling over each other to get the service and attention in a hurry which they otherwise might have had at their leisure. Even under these circumstances, and although the experiment was a new one so far as this province is concerned, it is now known beyond doubt that the campaign was a great success and has been the means of saving millions of dollars to the farmers of the province.

Even at this stage, however, there are those—principally in the urban districts this time—who gasp with astonishment when they read that the campaign will cost the country in the neighborhood of \$450,000, almost half of which is borne by the rural municipalities concerned. In considering the expenditure it would be well to also consider what it means to the country as a whole.

As a result of the campaign it is now estimated there will only be between two and three per cent. damage to the crops by grasshoppers in 1500 townships which took part in the campaign. It would be a conservative estimate to say that if it had not been for the campaign the loss would have been at the very least ten per cent. In a large percentage of the district covered by the campaign, crops are reported in excellent condition, and after allowing for the districts where crops are almost a failure it is estimated that the average yield over the entire district will be fifteen bushels to the acre. It will therefore be seen that a ten per cent. damage to crops in 1500 townships would run into millions of dollars. Of course we know that all of that fifteen hundred townships was not in crop. But supposing that a quarter of it were, a ten per cent. damage would mean that almost thirteen million bushels of grain would be destroyed. At a dollar a bushel the damage done would represent just that many million dollars.

Surely it was a good stroke of business for the government, and the municipalities to spend \$450,000 in order to save nearly thirteen million dollars worth of grain to the farmers.

The population of Windsor, Ont., has increased 4,000 in 12 months.

Montana Farmer
On How to Make
Farming Pay

SHOULD PRACTICE CROP ROTATION—RAISE STOCK OF SOME KIND—KEEP ACCURATE ACRES COUNTS AND DON'T WASTE ENERGY

At a meeting of the Irrigation Convention held in Maple Creek last week, I. D. O'Donnell, described as the best farmer in Montana, gave an address on "How to Make the Farm Pay".

The first essential in making the farm pay, Mr. O'Donnell said, is to have it developed and put into a condition to make it a profitable proposition.

The successful farmer was the one who dominated the situation and who managed his business along well defined lines. No system of farming was so susceptible to good management as irrigation farming, for the irrigation farmer controlled all the factors for success. He could work out a crop rotation and practice diversified and intensive farming because he controlled the moisture.

In making a farm pay the first thing to do was to plan a crop rotation. Good farming today demanded large yields, the maintenance of the soil's fertility, an even and economical distribution of farm labor, and minimum loss of the land. Crop rotation was more than the changing from one crop to another; it meant an intelligent arrangement of crops which met the requirements of the farmer's soil, his capital, his business plans and his markets.

As a general rule a good crop rotation has four essentials, namely a cash crop or one which may be sold directly from the field for cash; a cultivated crop, a crop which adds vegetable matter—in irrigation areas alfalfa, and a crop which furnishes food for live stock.

Every farmer should raise and feed stock of some kind. His idea of profitable farming was to keep sufficient stock to eat up every bit of forage grown on the farm and utilize all the pasture along ditches, in waste places and fence corners.

He emphasized the importance of farm records. From these records farmers would learn what crops paid and what did not pay.

He had been getting 50 bushels of wheat and 100 bushels of oats to the acre every year for the last ten years on his farm. This was due to crop rotation.

He advised farmers not to spread their energies over 360 acres if they could make just as much money out of 40 acres. Good crops could not be produced without good seed. Irrigation could and should produce the seed.

Mr. O'Donnell closed his address with an appeal for co-operation, which was simply the formation of co-operative organizations, but co-operation based on the confidence of people towards each other.

RED CROSS SHOWS A COMPLETE BABY OUTFIT

In the windows of the head office of the Red Cross, Calgary, are seen an interesting exhibit consisting of a complete baby outfit. "Everything for Baby" shows at a glance the right kind of clothing that any mother can afford to procure at moderate cost. A model of an infant is seen seated in a baby basket, with pictorial posters calling attention to the fact that children need not only a great amount of sleep but that if they are to grow up strong and well they must play with the window shade open, or better still in the open air. The baby outfit is all of equally of course, and not only to babies. How to make a refrigerator without ice is shown by two wooden boxes, one considerably smaller than the other. The small one is placed inside the larger, and the space between filled with wet sawdust or shavings, which should be kept constantly wet by pouring cold water over them. In the smaller box the milk, butter, etc., can be kept cool, and as the lid of the box is wire screened the food will be safe from the marauding house fly.

U.F.A. PRESIDENT PLEASED WHEAT BILL PASSED

H. W. Wood, president of the United Farmers of Alberta, expressed much satisfaction that the Wheat Board Bill was passed without a division. He expressed the hope that no time would be lost before the measure was placed on the statute book in order that arrangements might be made for the holding of the 1923 year's wheat crop.

The first shipment of new wheat has been delivered in Stratford, Ont.

Railway News

Irish newspapers follow up the carriers of Irishmen who leave the Green Isle. The Independent has the following item: A few days ago:

Mr. Herbert Samuel Holt, of Montreal, whose eldest son, Capt. H. P. Holt, M.C. is a member of the Canadian House of Commons, and Mrs. G. L. Holt, of Montreal, is a man of considerable standing in a Canadian commercial circles. He is a banker and railway engineer, and besides being President of the Royal Bank of Canada, is a director of the C.P.R.

He is an Irishman, being born in the Co. Kildare in 1856, the son of the late Mr. Gratian Holt, Capt. Holt was in the 1st Dragoon Guards.

J. M. Gilmore, chief clerk in the C.P.R. general offices at Leithbridge, has been transferred to the same position in the superintendents' office at Medicine Hat.

The former is being replaced in Leithbridge by S. G. Connolly of Medicine Hat. Mr. Gilmore was the first chief clerk in the Leithbridge division, having been in the position since the office August 1, 1914. He has been in the position since the Kintook since that date. He has always taken a keen interest in the activities of the C.P.R. Social and Athletic club.

No man in Canada has the reputation of being a railway man as the Canadian Pacific Railway Co., as a raconteur and a wit. Sir Thos. Wilson once called him "a national asset".

Mr. Ross added that he was glad that Sir Thomas had fortunately forgotten the fact that he was in the hospital undergoing an operation for appendicitis. Mr. Ross said that his reputation as a raconteur, probably, will show.

When last consciousness, he said, his last thought was "This is it".

"When I recovered from the effects of the opiate, I found myself in a darkened room, and wondered where I was and what I was all about. The kindly nurse who quickly discovered that my consciousness had returned, told me to my bed, and then I remembered everything. "But why this dark room? It was early morning when they operated on me, but now it can't be night."

"No, it isn't," she seriously replied. "You are afraid of the dark, the shock you might get."

"Well, there was a fire just across the street, and we were frightened. I was afraid of the flames, you might think that the operation hadn't been successful."

"That shows you what it is to have a reputation."

The Commercial Cable Company and C.P.R. Telegraphs have been over the Postal Telegraph Service in Newfoundland and no longer will have all business over the Newfoundland government's cables and land lines.

Whatever the volume of the coal and grain business this fall, the Canadian Pacific will be in position to handle it. This was the assurance given by Grant Hall, vice-president of the company, at a recent meeting of the board.

Mr. Hall is on his annual tour of inspection of the C.P.R. frame of mind regarding the crop situation in the three western provinces. Present prospects, he stated, were that there would be a fair average crop.

"No, I do not anticipate any complications arising on this side owing to the strike among United States shippers," he remarked in reply to a question.

Assistant Superintendent W. M. Neal of the C.P.R., who is leaving Toronto, to become general superintendent of Algoma district with headquarters at North Bay, and J. J. Humphrey, superintendent of the Trenton division of the C.P.R., who is to succeed Mr. Neal, were entertained to dinner by C.P.R. officials at Toronto recently. Mr. Neal was presented with silver cutlery and Mr. Humphrey with an umbrella.

A meeting of a committee of citizens named to consider the building of a Seamen's Institute at Quebec, on the site in the harbor across from the government, was held recently at the Royal Bank building.

Mr. J. T. Ross presided over the assembly, and a resolution was passed from the committee of the Canadian Pacific Railway, stating that it was authorized by Mr. George M. Bowser, on behalf of the C.P.R., to provide that the remainder of the amount required for the building be obtained from other sources.

The plan for an expenditure of over \$25,000 to \$30,000. It was decided to place this offer with gratitude, and preliminary discussion took place as to ways and means of collecting the balance of the amount.

RADIO TRADE GROWING NOW IN CANADA

Windsor leads the Dominion for the month of June in the matter of radio receiving licenses. It was followed by the Postmaster of that city. Toronto is second with 440. The total number of licenses issued throughout the Dominion during the month was 5,100. The fee for receiving license is \$1.00.

CLOUDBURST FLOODS

NEBRASKA TOWNS

Ten towns and the farms of North Nebraska were flooded Sunday night by a cloudburst which sent a wall of water rushing down the North Platte valley to Norfolk, endangering a portion of the city. Cloudbursts were accompanied by hail. Damage is estimated at \$10,000,000.

"More terrible machines than in the late war are being constructed," said Premier Lloyd George at a luncheon given by 500 prominent Free Church men in London.

Dr. Alexander Graham Bell, inventor of the telephone, died yesterday.

The new Premier-elect of Manitoba is only 39 years old; and will be the youngest man ever to be Provincial Premier, with the exception of the late Sir Richard McElwaine. He is a Canadian by birth and education, and comes of generations of farming stock.

SUNFLOWER VARIETIES

(Experimental Farms Note).

Although sunflowers have been known and used for a great many years, it is only in recent years that the wide agricultural possibilities of the crop have been fully appreciated.

With the advent of mixed farming in the former district grain growing, most of the country and the growing recognition of the value of the oil has come the demand for a crop which offers areas unsuited for other growing.

It is in this connection that sunflowers offer the greatest possibility.

As yet there has not been sufficient breeding work or testing of varieties to warrant any definite statement regarding the different so-called commercial varieties.

As the sunflower is an open fertilized plant most commercial seed is a mixture of types. This fact, however, affords as a possibility of eventually securing uniform varieties of the most desirable kind.

At the present time the George Croft Division has isolated a large number of types of sunflowers. These range in height from three to seven feet, and in habit of growth from bushy to upright.

Some of the types have a single head to types having heads at each end of the stem and numerous heads. There is also wide variation in the color of the petals from branches growing straight out to those that grow almost parallel with the main stem.

Some of the types have a very considerable promise of becoming very desirable commercial varieties.

The commercial varieties tested so far at the Central Experimental Station have shown a variation in yield from as low as ten tons per acre to as high as twenty-three tons per acre.

The average yield of the best variety of these varieties available is 14.2 tons per acre. It is the intention of the Ministry of Agriculture to publish results of other sunflower experiments in Canada.

United States are also being secured in recommending this variety for the grower growing it at the present time for the man who desires to grow sunflowers for oil.

What is stated to be a record shipment in dairy produce for Montreal last one day during the week, when a single wagon carried away a cargo consisting of 55,254 packages of butter, of which 45,254 packages were shipped by local exporters and 9,000 packages by Western Union.

The total weight of the cargo was approximately 3,600,000 and valued at about \$1,150,000.

NOTICE

NOTICE is hereby given that a petition has been presented to the Council of the Town of Redcliff under the provisions of "The Early Closing Act," praying for the passing of the following Early Closing Bill:

"A BY-LAW OF THE TOWN OF REDCLIFF to provide for the early closing of shops in the Town of Redcliff."

"THE MUNICIPAL COUNCIL of the Town of Redcliff acting as follows: During the months of May, June, July, August and September of each year, all shops in the Town of Redcliff are to close at 6 o'clock p.m. on each Wednesday during any of the said months."

2. It shall be unlawful to carry on any retail trade or business in those mentioned in the schedule hereto after the closing hour mentioned in the preceding schedule, except within the limits of the Town of Redcliff, not being a street or school, and persons so doing shall be guilty of an infraction of this by-law.

3. If several trades or businesses are carried on in the same shop and if any one or more of the said businesses are in those mentioned in the said schedule, the shop shall be open after the said closing hour for the purpose of sale of such goods as are mentioned in the said schedule, and for no other purpose whatsoever.

4. Any person violating the provisions of this by-law shall be liable on summary conviction thereof before a Justice of the Peace:

(a) For a first offence, to a fine not exceeding \$5.00 and costs;

(b) For a second offence, to a fine not exceeding \$10.00 and costs;

(c) For a third and subsequent offence, to a fine not exceeding \$100.00 and costs.

Provided that no person shall be deemed to be guilty of an offence hereunder after the closing hour any customer who is in the shop at such hour.

5. In this by-law the expression "retail" shall include the sale of goods or a corporation.

6. This by-law shall come into effect upon the day of the date of the final passing thereof.

SCHEDULE

The sale of medicines and medical and surgical supplies.

The sale of refreshments for consumption on the premises.

The sale of books and other similar goods.

The sale of newspapers and magazines.

The playing of billiard and pool room or bowling alley.

Business of meat livery and garage.

NOTICE is hereby further given that objections to the petition submitted to the Council praying for the passing of the above by-law may be presented to the Council at any time before the 15th day of August, 1922, and that if no objection is presented by that date the Council will forthwith proceed to pass the said closing by-law.

F. H. COURTNEAY, Secretary-Treasurer.

Weekly News Bulletin

Issued by Publicity Commissioner, Government Buildings, Edmonton.

Grasshopper Campaign Success

Loss of crop from grasshoppers in Alberta this year, throughout the entire territory will be only from two to three per cent, and in the majority of districts the loss has been practically nil, according to a statement issued by H. E. Strickland, entomologist in charge of the field work for the Alberta Department of Agriculture.

In the grasshopper campaign. The saving of crop effected by the campaign will be many times greater than the cost of the campaign.

Mr. Strickland, however, lays great stress on the fact that stubbled-in crops offer the greatest opportunity for damage from the hoppers.

He states that the "Lesser Migratory Hopper" is the greatest menace, and this hopper lays its eggs promiscuously over stubble land and deserted farms. He recommends against the planting of crops on stubble land unless the land has been plowed to a depth of seven inches. Deep fall plowing is particularly recommended.

Mr. Strickland also points out that through failure to realize the seriousness of the situation on the part of some, sufficient roadside grasshoppers escaped to re-infest the districts concerned for next year.

He therefore urges a campaign of poisoning to be carried on during August to destroy the eggs as they go on breeding grounds. By the end of August, he states, egg-laying ceases.

Trouble is also being experienced through hungry cutting under trees. Mr. Strickland recommends that twice

should be soaked in a solution of one part of kerosene to three parts of water. The hells of trees will either be thoroughly dried out before getting on the blinder, or can be put on soaking wet, as half dried timber will cause trouble. A system of spots could be rigged up on the blinder to carry the tissue through a can of solution just before it reaches the blinder.

According to a statement issued by the municipal hall board of Calgary, the hail losses in Alberta have been very light to date. Thus far the losses are said to be 10 per cent, lighter than for the same period of last year.

Railway for States

Following negotiations carried-on by the publicity department of the provincial government, it has been decided to place exhibits from the agricultural department at several of the fairs in the Western States.

Pairs in South Dakota and Iowa will be visited, and also the state fair in Colorado, where irrigation exhibits may be secured.

The exhibit has been authorized by the Hon. G. H. Ross, Minister of Agriculture. The exhibit has been prepared for some time by Frank Peterson, an expert in this line, who has been engaged on this work by the Alberta Government in previous years, and who made up exhibits for Toronto and Chicago some years ago.

P. Schow, consul-general for Denmark in Canada, was a visitor at the Government building the past week. He is investigating conditions in the West.

His statement following his visit here was that conditions in the West were very good.

He stated that the conditions in the West were very good, and that the people were very happy.

He also stated that the conditions in the West were very good, and that the people were very happy.

went in connection with the possible immigration of settlers from Denmark.

During August a party of newspaper men from South Dakota will visit Alberta for the purpose of visiting different parts of the province. Another large party will visit the province shortly and will be 100 business men and their wives from Minneapolis.

New tariffs have been issued by the Dominion government, according to word received by A. Chard, freight supervisor for the government, which provide a decrease in rates on grain for export, going via Vancouver.

The new rate from Edmonton to Vancouver on grain for export will now be 25 cents per ton, the reduction being 10 per cent. The maximum rate from points east of Edmonton as far as the Alberta boundary will be 28 cents.

Premier Greenfield stated in the Legislative Assembly that the cabinet is considering calling a conference of operators and miners with a view to effecting a settlement of the present coal strike in the province.

May Supply The department of agriculture has commenced investigations respecting the supply of hay to be had in the northern districts. Three men have been retained and are making daily reports to the department respecting the amount of hay available in the districts.

About ten days ago the provincial department requested the minister of the interior to withdraw all permits for cutting hay for export for several settlers for the province, until such time as a thorough survey of the hay situation has been made by the provincial department of agriculture.

This was immediately agreed to by the minister of the interior.

Strawberries are doing well in several districts in Alberta this year. The farmer east of Calgary has shipped 1200 boxes this summer from his place.

Cost of Grasshopper Campaign During the session of the Legislature the past week, Hon. Geo. Hawley made the announcement that the grasshopper campaign, which covered over 1500 townships in the province had cost about \$450,000, about half of which had been borne by the municipalities. This amount was equal, he said, to what would be produced from less than two townships.

He stated that the campaign had covered over 1500 townships and the saving would be many times greater than the cost.

Mr. Geo. Hawley made the announcement in the house that he had taken up with the Dominion Trade and Commerce Branch the matter of procuring a market for rye which will be produced in Alberta this year. France is one country which has a very extensive market for rye this year, and negotiations to reach this market are going forward.

terfor. Several thousand tons of hay have already been located by the men who are in the field. Settlers who desire to put up hay for their own use may secure information as to this hay by communicating with the department of agriculture, Edmonton.

Dr. F. A. Wyatt, who is conducting a soil survey of southern Alberta, reports that he has reached Purple Springs with his parties, about half way to Medicine Hat from his starting point in Grannum. Work is also being done in the Crowsnest district. Dr. Wyatt hopes to cover the ground as far as Medicine Hat this fall. Two parties are in the field engaged in this work under Dr. Wyatt.

As a result of the reports on the part of A. Chard, freight supervisor for the provincial government, the Dominion Express Co., has granted a reduction in the minimum billing weight of fish from northern points in Alberta from 30,000 to 20,000 pounds, which will prove a considerable convenience for the fishing industry.

Strawberries are doing well in several districts in Alberta this year. The farmer east of Calgary has shipped 1200 boxes this summer from his place.

Cost of Grasshopper Campaign During the session of the Legislature the past week, Hon. Geo. Don't Push

Reports from all parts of Western Canada are at the time this article is written, distinctly optimistic as to crop conditions are concerned. The heavy spring rains, while they retarded seeding operations in some districts, and resulted in certain low-lying lands but better seeded, nevertheless insured an early start. Then, during the latter part of June rains poured and fell fairly generally throughout the West, giving the growing grain sturdy development and providing needed moisture for rapid growth.

Sections of the country which during recent years have been afflicted with the grasshopper plague report a marked decrease in the pest, while never before have farmers generally been so well organized and ready to fight this danger.

Reductions in freight rates, and the passing of legislation calculated to assist in the marketing of the crops, are also factors in the situation, leading to the hope that, providing the crop passes through the danger all ahead, a reasonably profitable return on the season's operations will be realized.

It is never wise, however, to figure on a crop until it is actually harvested and marketed because many eventualities may occur which must be faced, and neither should the probabilities of the Western grain crop be figured on until the harvest is actually in.

Evidence is not lacking even at this early date that some creditors are planning to emphasize their claims in debt, are levying on and preparing for what they term a "clean up" this year. In other words, they are planning to emphasize their claims in debt, are levying on and preparing for what they term a "clean up" this year. In other words, they are planning to emphasize their claims in debt, are levying on and preparing for what they term a "clean up" this year.

It is a well known fact that the Government is not prepared to meet the claims of the grain growers, and that the Government is not prepared to meet the claims of the grain growers, and that the Government is not prepared to meet the claims of the grain growers.

On the other hand it must be fully recognized that there is no unwelcome burden of debt now resting on the country which must be paid off to the last dollar. It is possible to secure out of this year's production and yet leave sufficient to enable farmers to enjoy the necessities of life and continue to "carry on" next year.

The whole credit system of the country, and the stability of the entire financial and business fabric depends that this be done. "Carry on" next year. The whole credit system of the country, and the stability of the entire financial and business fabric depends that this be done.

There is, therefore, imperative necessity for mutual understanding, good will and active cooperation between debtor and creditor this year. There must be no tendency on the part of the debtor to evade or procrastinate, but to open, honest efforts to pay the debt, and on the part of the creditor to the full extent of his ability. Creditors, on the other hand, must appreciate the fact that the good crops of this year will mean a more prosperous year of no crops. They must, therefore, be reasonable, and those who are to be reasonable must take in hand and completed to be done.

The national interest is not purely an appreciation of these things, but a practical recognition of them. National interests are paramount, and every individual citizen should be able to see that the interests of his own pocket should be sacrificed to the national interest, and that they should be able to do so.

Old-Time Postal Service

An Extra Charge for Late Mail Was Made in England
A hundred years ago in England, anyone who mailed a letter too late in the day was subject to a fine. In the letters were mailed in London before 4 o'clock, a fee of a penny (or each one had to be paid) to the bellman who collected the late mail. The postman was an important personage in those days. He was all done up in red and white, blue scarlet coat, blue breeches, white stockings, with a great cockade in his hat. Those who chose to carry letters to the general post office could do so, but if they wished to have letters received after a certain time no less than sixpence must be paid. It was usual for postage to be collected from the person who received a letter.

More than 5,000 pounds of pure gold, says an authority, are required each year to supply the wedding rings for our brides.

Every dollar spent to your home town is a boost for the community.

English Motor Cars

British Concern May Establish a Plant in Canada
A cable from London announces that an English motor car concern is to make the experiment of establishing a branch in Canada to enable its product to compete with the American cars now made and sold here. An assembling plant will first be built in the Dominion and if this is successful, complete manufacturing will be undertaken. This pioneer to the movement to construct English cars in Canada will be able to sell its product for less than \$1,000.

Pains in Back, Limbs and Side Yield to 'Nervine.'

If you have failed to secure relief from rheumatism, sciatica, or any of the other ailments which are caused by the nerves, you should try 'Nervine.' It is a powerful remedy for all the above ailments, and it is the only one that will give you relief. It is a powerful remedy for all the above ailments, and it is the only one that will give you relief.

Asking Too Much
Doctor—Your trouble is dyspepsia. You should hardly believe and after meals.

Patent—That's impossible. I can't eat without feeling sick and wash up the dishes afterwards.

OVERWORKED NERVES

The Most Successful Treatment is Through the Blood
The blood is the life of the body. It is the blood that carries the food and the oxygen to the cells of the body. It is the blood that carries the waste products of the body to the lungs and the kidneys. It is the blood that carries the heat of the body to the surface. It is the blood that carries the life-giving force of the body to the cells of the body.

Animal Intelligence

Interesting Incidents Showing Reasoning Powers of Dogs
In England a short time ago, says an exchange, a medal was awarded a Great Dane for saving his master's life. A roaring, deafening wind was blowing, and the man was walking alone a dark, gloomy road with his head down.

The dog was some distance behind, but presently he came at a rapid pace, took a jump at his master, and sent him sprawling into the hedge. The dog himself could not escape the onset of the car which, but for his intervention, would have killed his master, was badly injured.

Quite recently an Irish terrier, of its own accord, paid repeated visits to a Croydon hospital for treatment, while in the boardroom of King's College Hospital, London, is a picture of two furriers securing a wounded coat, that most common of "vase incidents" depicted is a true one. The owner of the dogs was a bookmaker named Hunt, and his explanation of the dog's conduct was that they had been sent to the hospital that they might have noticed people who had had with accident being taken there. "They used their knowledge," when their friend, the collie, was run over by a cab.

Owners of bull terriers have collected a number of their favorite breed. One of the best of it the anti-vase incident is a dog named "Bobby." It was a wonderful dog and had taken prizes everywhere, but eventually he grew old and his son, named "Bobby," was born.

Evidently, however, he thought this was an oversight on the part of his master which it was his duty to rectify. Consequently he jumped through a window and made his way through miles of London (thick traffic) and finally arrived at the hospital, where he took his place on the stand.

Scotland Intends to Utilize Waterfalls
Scenic Streams Will Soon Turn Wheels for Industries

Scotland is waking up to the fact that its lakes and waterfalls may be made to serve other purposes than providing scenic attractions for tourists. As proof of this the "Glasgow Electricity Bill" has been given a second reading in the House of Commons.

The company is empowered to collect and use the waters of 15 lochs and 93 small lakes, gives out streams over an area of 417 square miles.

The water proposed to be utilized are estimated to be capable of generating 55,000 horsepower to supply electricity to the counties of Perth, Kinross and Forfar and districts in four other counties. The capital is placed at £4,500,000.

Any of the beautiful lakes and falls of "Glasgow, Perth and Kinross" would be used to set the wheels of industry spinning, many in Scotland regard almost as sacrosanct a decoration. And that opinion is shared by not a few Canadians who are accustomed to visit Scotland annually.

But the promoters declare that the preservation of the natural beauties of Scotland is expressly provided for by the terms of the bill. And they add that when the hum of the electric-driven wheels of industry are heard in the land, and dividends begin to come in, the cry of "destruction" will be silenced.
